## **Why does TLC Preschool think it's so important for our Preschool classes to be active?**

**The first five years of a child's life are the most important in terms of development as the brain is busy growing and creating neural connections with each new experience.**

**The more a child moves their body in different ways, the more connections that are created.**

**The more that child explores those movements, the stronger those connections become, building a strong foundation for future learning and development.**

# **Gentle Reminders**

**We ask parents to remember the following:**

- **When packing your child's snack for the day, please ensure it is "ready to eat". We do not have utensils or a microwave for Preschool classes.**
- **We ask that all snacks are peanut free!**
- **In place of a juice box, we encourage you to send along a water bottle to class with your child. This comes in handy throughout the entire class and when we are active in the gym!**
- **Please label all your child's belongings so we know what goes home with who**
- **Newsletters will be available on paper in your classroom, on our website and via email upon request**
